Figure 1. Cisco Room Bar Pro with dual flat screen displays for video conferencing in a medium-sized meeting room

Cisco Room Bar Pro is an integrated, AI-enhanced video bar solution featuring intelligent dual cameras, a three-channel loudspeaker system, built-in microphone array, a powerful computing engine and rich connectivity options, combined with an intuitive touch controller and smart room accessories to provide intelligent, inclusive video collaboration for medium-sized meeting spaces.

It's a powerful video conferencing device that connects with up to three screens to video-enable and upgrade medium meeting rooms, training rooms and other spaces in a way that's easy to deploy, manage and scale.

Video-enable your medium rooms at scale with a room collaboration device that's easy to deploy, engaging to use, and more affordable to maintain—creating a connected, intelligent workplace.

Figure 2. Cisco Room Bar Pro paired with dual flat screen displays for video meeting and content sharing running the native Microsoft Teams Rooms experience

Product overview

This smart video bar scales artificial intelligence-powered video meeting experiences, room configuration flexibility, interoperability, and workspace intelligence to elevate video conferencing from a wide set of workspaces.

AI-enhanced, cinematic video meetings

Cisco Room Bar Pro uses sophisticated image sensors and powerful image processing to enable enhanced camera reach, improved image quality and wider field of views to any workspace. Its dual, 96 MP camera system offers a 112-degree field of view lens and a tele-lens that seamlessly work together to bring clear, optimized framing for every participant in the room.

This is augmented with spatial audio, improved speech capture and machine learning-powered noise removal supporting engaging acoustic experiences for in-room and remote participants alike. In addition, the device works with the multi-directional Cisco Table Microphone

Pro digital conferencing peripheral for high-fidelity voice capture over IP.

The Room Bar Pro scales the best of AI into any room with intelligent framing, voice commands, virtual meeting zones, closed captioning, and real-time translation to any video meeting. The solution integrates with up to three external screens and offers a versatile set of wired and wireless content sharing options for rich video collaboration.

Figure 3. Cisco Room Bar Pro deployed with a triple-screen setup for video meeting and content sharing running the native Cisco RoomOS experience

Easily equip and scale your spaces for hybrid work

The device seamlessly and securely connects with flat-screen external displays, various analog, USB and PoE conferencing microphones, speakers, and other room accessories to help elevate the room experience. End users can easily connect the video bar with dual video and content sources via HDMI and USB-C, and pair laptops and portable devices with a single USB-C to enable effortless switching to BYOD mode for software-client based video conferencing.

It provides advanced connectivity and allows for simplified cable management to bring seamless room setup and user experience to any room. The consolidated mounted unit, the built-in power supply and the versatile input and output integration create effortless deployment while removing the need for various adapters and complex cabling in the meeting room.

Get unrivalled interoperability

Room Bar Pro is a powerful video bar appliance for native, laptop-free video collaboration that offers native support for Microsoft Teams Rooms and Cisco Rooms, on a secure, purpose-built platform. The device is the most advanced video bar solution designed for medium sized spaces, uniquely delivering these native experiences.

Room Bar Pro was designed for multi-platform experiences in mind. When configured for Cisco Rooms, it powers the native Webex experience combined with advanced interoperability with Microsoft Teams, Zoom and Google Meet, while in native Microsoft Teams Rooms mode it gives the option to join full-featured Webex meetings beyond the native Microsoft Teams and Zoom direct guest join experience.

Figure 4. The Cisco Room Bar Pro video bar unit from top, front, side, bottom, and back view

Keep your devices and spaces under control

Room Bar Pro can be deployed as a fully managed, secure IT asset and comes with a single pane of glass view of device and workspace metrics in the Control Hub. It's easy to deploy and set up, while leveraging unified management, remote monitoring, diagnostics, analytics, and workspace insights across your entire Cisco deployment. By doing so, IT and Facilities teams can monitor device health and usage, and check environmental conditions and occupancy to enable better resource planning.

With Cisco Room Bar Pro, users can easily access conference controls and device settings, add room booking, control room peripherals, and access third-party workspace apps with the Cisco Room Navigator touch device featuring built-in room sensors—deployed either as a tabletop or wall-mounted panel.

Features and benefits

Table 1. Cisco Room Bar Pro features and benefits

FEATURE	BENEFIT
AI-enhanced, cinematic video meetings	<ul style="list-style-type: none">• Full HD, immersive video meetings powered by an all-in-one, codec-powered video conferencing appliance optimized for medium workspaces• Simplified, one-button-to-push meeting-join experience on Webex and third-party meeting apps, including Microsoft Teams, Zoom, and Google Meet, powered by robust video interoperability (available on Cisco Rooms)• Native support for Microsoft Teams Rooms on Android while providing the ability to join full-featured Webex meetings• Sleek, all-in-one design and thin form factor available in carbon and first light color options to augment the room experience• Video bar includes a integrated, codec-powered video collaboration bar featuring 96MP dual camera system, noise cancelling microphone array, 3-channel loudspeakers, a powerful computing engine featuring an AI-powered NVIDIA chipset, and extended connectivity options via Ethernet, USB, HDMI and analog ports• Brings optimized, AI powered views using camera intelligence:<ul style="list-style-type: none">- 112-degree horizontal field of view supported by the wide-angle lens: Allows everyone in the room to remain visible, even when capturing people at a shorter distance. In parallel, the 70-degree-field-of-view tele-lens captures and frames those located further from the device. An additional virtual lens via software enhancement allows to extend the camera reach to make sure even those sitting at the far-end of the table come across sharp (coming soon).- Frames camera mode: Uses AI to automatically capture a condensed view of in-room participants and frame them individually or in smaller groups for more equitable meetings (available on Webex and third-party meeting platforms).• Beamforming, 16-element microphone array allows for enhanced noise cancellation and voice capture for a more inclusive experience for remote participants. Combined with machine learning-powered noise removal, it blocks out even those unwanted background noises that are not eliminated by traditional noise cancellation technologies.• Audio pickup can be extended with external microphones to adapt to a wider array of meeting spaces over IP (support for multiple Cisco IP microphone units), USB and analog connectivity• 3-channel loudspeaker system allows for clear stereo sound on any platform, and supporting directional audio in Webex Meetings by emitting sound closer to the live video feed of the active remote speaker, resulting in a truly immersive, spatial audio experience

Table 1. Cisco Room Bar Pro features and benefits

FEATURE	BENEFIT
Flexible connectivity	<ul style="list-style-type: none">• Supports up to three screens for video and content over HDMI out. Connects with an interactive touch display over HDMI and USB to enable digital whiteboarding and annotation• Supports dual content sources for local meetings (HDMI and USB-C)• View whiteboard content and annotations shared from Cisco Board Series, Desk Series, or the Webex App• 4K wireless content sharing for exceptional presentations with Webex, Miracast and Apple AirPlay• USB passthrough for instant BYOD – Connect your laptop with Room Bar Pro via a single USB-C to use the camera, microphones, and speakers of the device for an instant studio• Streamlined connectivity with AV over IP, USB and analog room peripherals, including Cisco and third-party digital microphones, external cameras, and more accessories• USB-A connection for microphones, speakers, keyboard, and touch display• Automatic screen/display integration through HDMI CEC• Supports Wi-Fi and Bluetooth*** (not available on non-radio version)
Workspace intelligence	<ul style="list-style-type: none">• Runs on RoomOS for an intuitive, secure user experience that is consistent across Cisco Room, Board and Desk Series—removing barriers from adoption with an operating system purpose-built for video collaboration• Uses ultrasound technology to automatically detect presence and activate the device when someone walks into the room, and recognizes them through their mobile device• Comes with the Cisco Room Navigator tabletop control unit for native conference controls, access to device settings, room controls, and environmental sensor-based monitoring. Can be paired with the wall-mount Room Navigator to augment the room experience with room booking, scheduling, and third-party workspace experience applications for space reservation, wayfinding, digital signage, and more• Provides intelligent people count based on presence sensors and custom macros, enabling alignment with safety guidelines and analytics for better resource planning• Enables smart customizations via macros and custom APIs, such as digital signage, custom alerts, and UI extensions• Device controls with voice commands using the Cisco AI Assistant• Control peripherals such as lights and blinds through the Cisco Room Navigator• Environmental sensors when connected to the touch controller measure humidity, temperature, noise levels and air quality

Table 1. Cisco Room Bar Pro features and benefits

FEATURE	BENEFIT
Simplified deployment and management	<ul style="list-style-type: none">• Unified management, provisioning, remote monitoring, troubleshooting, cloud API integration, device and workspace analytics in the Control Hub device management portal• Flexibility to register on-premises or in the Webex Cloud• Hardware is optimized to run on a cloud platform for great experiences in shared rooms and spaces with easy access to hosted conferences• Single vendor and support path simplifies IT efforts and helps reduce operating costs• Secure architecture and management powered by Cisco RoomOS operating system• Circular device design, simplified and 100% recyclable packaging, and optimized energy consumption for sustainability. Carbon emission insights coming soon to Control Hub to help keep track of and optimize the carbon footprint of the Cisco device deployment

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
Audio inputs	<ul style="list-style-type: none">• 1x HDMI input• 2x analog line in for microphone input• 2x PoE supporting audio over IP. Support for up to 8x Cisco IP microphones or 8x third-party digital microphone microphones via AES67. Depending on the number of microphones deployed, you may need a PoE compatible switch, eg. Catalyst C1200. Please note that connecting third-party IP microphones via AES67 requires an AV Integrator license.• 1x DisplayPort/USB-C input• 2x USB-A input• Bluetooth® - Not available on Non Radio Version**
Audio outputs	<ul style="list-style-type: none">• 1x analog line output• 1x DisplayPort/USB-C output• 2x USB-A outputs (to connect with DSP, or an USB audio device)• USB-C port for BYOD experience• Connectivity with third-party networked audio systems via AES67 standard• Bluetooth® - Not available on Non Radio Version**
Microphone and loudspeaker system	<ul style="list-style-type: none">• 3-channel loudspeaker system with 3 high-quality full range drivers and a separate mechanically balanced dual woofer section, supporting directional audio• Loudspeaker system frequency response 70 Hz to 22 kHz [+ 3 / -6 dB]• Max output Sound Pressure Level 97 dB• 16-element beamforming microphone array for speech pick-up and support for speaker tracking• Microphone array frequency response: 120 Hz to 16 kHz [+/- 6 dB] <p>Note: The internal microphone array is optimized for use in small to medium sized meeting rooms with people seated within 4 meters from the device. In meeting rooms with people seated more than 4 meters from device, we recommend adding external microphones to ensure the best audio experience. Please note that room acoustic conditions and background noise level also impact the speech pick-up quality.</p>
Presenter tracking	<ul style="list-style-type: none">• Requires connecting the Room Bar Pro with the Cisco PTZ 4K Camera via Ethernet and HDMI in• Camera dynamically follows the local presenter within a defined zone and helps ensure an optimized view• AI-powered face and upper-body detection capability

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
Speaker tracking	<ul style="list-style-type: none">• The integrated microphone array enables sophisticated speaker tracking capability• Best overview functionality auto-detects people in the room and frames them for the best group view. When someone is talking, the system uses audio triangulation to detect the active speaker and selects the best framing to show an optimized, prominent view of the speaker• For an optimal speaker tracking experience for people joining remotely, it is recommended that the furthest in-room participant is located within up to 6 meters from the video device. Please note that the best overview (automatic group framing) camera mode is able to support an extended distance from the Room Bar Pro.
Content stream	<ul style="list-style-type: none">• H.239 (H.323) dual stream• Binary Floor Control Protocol (BFCP) Session Initiation Protocol (SIP) dual stream• Supports resolutions up to 3840 x 2160 at 15 fps and 1920 x 1080 at 60 fps
Wireless sharing	<ul style="list-style-type: none">• Webex app (up to 3840 x 2160 at 7.5 fps, including up to 1920 x 1080 at 30 fps)• Miracast (1920 x 1080 at 60 fps) – Not available on non-radio version• Microsoft Teams Cast (up to 1920 x 1080 at 15 fps) – Available only on Microsoft Teams Rooms• Apple AirPlay wireless sharing<ul style="list-style-type: none">– Bluetooth® discovery (not on non-radio version) and Bonjour service discovery– Screen mirroring up to 1920 x 1080 at 60 fps– Extended desktop (Mac only) – up to 1920 x 1080 at 60 fps– Video streaming up to 3840 x 2160 at 30 fps
Multipoint support	<ul style="list-style-type: none">• 4-way embedded SIP/H.323 conferencing capability with MultiSite option
MultiSite features	<ul style="list-style-type: none">• Up to 15 Mbps total MultiSite bandwidth (6 Mbps in point-to-point calls)• Adaptive SIP/H.323 MultiSite:<ul style="list-style-type: none">– 3-way resolution up to 1920 x 1080 at 30 fps + content up to 3840 x 2160 at 15 fps– 4-way resolution up to 1280 x 720 at 30 fps + content up to 3840 x 2160 at 15 fps– 5-way resolution up to 1280 x 720 30fps + content up to 3840 x 2160 at 15 fps• Full individual audio and video transcoding• H.323/SIP/VoIP in the same conference• Support for presentation (H.239/BFCP) from any participant at resolutions up to 3840 x 2160 at 15 fps• Best impression (automatic continuous presence layouts)• Encryption and dual stream from any site

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
IP network features	<ul style="list-style-type: none">• DNS lookup for service configuration• Differentiated services (Quality of Service [QoS])• IP-adaptive bandwidth management (including flow control)• Automatic gatekeeper discovery• Dynamic playout and lip-sync buffering• H.245 Dual-Tone Multifrequency (DTMF) tones in H.323• RFC 4733 DTMF tones in SIP• Date and time support using Network Time Protocol (NTP)• Media adaptation and resilience• Uniform Resource Identifier (URI) dialing• IPv4 Dynamic Host Configuration Protocol (DHCP)• IPv6 (both static and stateless address auto-configuration)• HTTP(S) proxy support (for signaling, not media)• Inspecting Transport Layer Security (TLS) proxy supported• Cisco Discovery Protocol (CDP)• 802.1X network authentication• 802.1Q Virtual LAN• 802.1p (QoS and Class of Service [CoS])
IPv6 network support	<ul style="list-style-type: none">• Single call stack support for both H.323 and SIP• Dual-stack IPv4 and IPv6 for DHCP, SSH, HTTP, HTTPS, DNS, DiffServ• Support for both static and automatic IP configuration (stateless address auto configuration)
Security features	<ul style="list-style-type: none">• Secure management using HTTPS and SSH protocols• End-to-end encryption for calls and meetings on Webex• Standards-based media encryption on all back-ends (Secure Real-time Transport Protocol [SRTP], using AES-128-GCM or AES-256-GCM)• WPA3™ and WPA3-Enterprise with CCMP128 Wi-Fi ® security• Password protection to access administration available on Room Navigator controller• Network settings protection• Privacy cover

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
Certificate management	<ul style="list-style-type: none">• The device comes with a manufacturer installed certificate (MIC) signed by Cisco’s manufacturing CA which can be used for Certificate Authority Proxy Function (CAPF) for secure onboarding to Cisco UCM• Option for users to install certificates with matching private keys for services such as IEEE802.1x, Wi-Fi, HTTPS server and SIP-TLS• Support for all regular certificate types and key sizes. The device comes with a pre-installed list of CAs (Certificate Authorities) that is vetted by Cisco and updated regularly. You can add or remove certificates from this list if desired. The CA list is used for outbound HTTPS and other TLS connections.
Network interfaces	<ul style="list-style-type: none">• 1x Ethernet (RJ-45) 10/100/1000 Mbps for LAN (external network)• 1x Ethernet (RJ-45) 10/100/1000 Mbps PoE (802.3af) port with a power budget of 15.4W enabled for Cisco Room Navigator touch panel direct pairing• 2x Ethernet (RJ-45) 10/100/1000 Mbps PoE (802.3af) port with a power budget of 15.4W per port for AV over IP peripherals and Cisco/Third-party party audio equipment (can be extended with a PoE compatible switch)• Wi-Fi 802.11a/b/g/n/ac/ax 2.4/5/6 GHz, 2x2 Multiple-Input Multiple Output (MIMO). Wi-Fi 6E 6GHz TriBand support. Wi-Fi support is not available on non-radio version.• Note: Due to compliance regulations, it is recommended to enable 802.11d in the access point for the product to operate properly within 5725 MHz–5875 MHz. A Wi-Fi connection can be used as a flexible option. Ethernet connection is always preferred for high performance.
USB-C passthrough	<ul style="list-style-type: none">• Ability to provide camera, microphone, and speakers over one USB-C cable to a connected computer• USB-C support up to 3840 x 2160 at 30 fps (computer must support Alt-mode Display Port)• USB-C passthrough and content sharing with the same cable
Other interfaces	<ul style="list-style-type: none">• Bluetooth® and Bluetooth® Low Energy** (not available on non-radio version)• 2x USB 2.0 port type A for touch display, microphones, keyboards and room peripherals• 1x micro-USB port (service port)• Factory reset pinhole• Safety key slot (Kensington safety slot)
Sensors	<ul style="list-style-type: none">• Presence sensor powered by ultrasound technology embedded into the video bar• Environmental sensors measuring temperature, humidity, air quality and other room conditions included in the Room Navigator control panel (please consult the Cisco Room Navigator datasheet for more information)

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
Power	<ul style="list-style-type: none">• 100 to 240 VAC, 50/60 Hz• Average 20 W• Networked standby 12,7 W• Standby 1 W• Easily accessible power button on the top side of the video bar• Configurable for office hours mode, forcing the device into standby mode outside of the preset office hours and to half-wake mode at the beginning of the working hours
Mounting	<ul style="list-style-type: none">• Consolidated mounting unit fit for walls and displays• Gap bar allows for a more aesthetic installation, covering the gap between the video bar and the display(s)• Video bar supports flexible mounting either above or underneath the screen(s)• When the video bar is installed underneath the display(s), the unit can be turned upside down for streamlined cable management and a cleaner setup.• The speaker grille can be easily de-attached and flipped to align with the mounting• Built-in power supply allows for simpler installation and smaller packaging, and allows for more energy efficient use
Operating temperature and humidity	<ul style="list-style-type: none">• 0° C to 35° C (32° F to 104° F) ambient temperature• 10% to 90% Relative Humidity (RH)
Storage and transport temperature	<ul style="list-style-type: none">• -20° C to 60° C (-4° F to 140° F) at RH 10% to 90% (non-condensing)

Table 3. Cisco Room Bar Pro product specifications

SPECIFICATION	DESCRIPTION
Sustainability	<ul style="list-style-type: none">• Circular design principles applied for product architecture, materials and packaging• Improved packaging efficiency and reduced amount of single-use plastics in the box• Consolidated mounting unit for wall and screen• Foam-free, 100% recyclable packaging design including fibre-based, paper pulp trays, instead of box-in-the-box packaging• Over 50% of all plastic in the device is Post-Consumer Recycled (PCR) resin originating from end-of- life devices and old electronics. Opt-in required for certain accessories to remove redundant components thus eliminating unwanted parts from the box. The video bar is designed for easy repair, refurbishing, and recycling to extend the lifecycle of the product and the materials used for manufacturing• Networked standby mode and Office hours on Cisco devices supported to lower energy usage• Using built-in presence sensors in the device and environmental sensors in the touch panel, it can provide real-time and historical occupancy and room metrics to control the workspace environment and optimize power consumption• Cisco’s takeback and reuse program enables you to return your end-of-use devices for free, via a simple, secure and sustainable process. <p>Learn more about how Cisco supports the Circular Economy.</p>
